100N Series Professional Composite Speaker

Glass reinforce nylon speaker creates electrical isolation from vehicle chassis while repelling extreme weather and environmental conditions.

100N Series Professional Composite Speaker #ETSS100N

Features

- Weather tested, glass reinforced nylon material will not corrode like a traditional aluminum speaker
- Composite housing creates electrical isolation from vehicle chassis to extend product life
- Improved design for passive water and moisture egress
- Designed for clear, powerful output using neodymium magnet
- Compact design with powerful 100 watt output
- Includes universal bail bracket
