

## Introducing DoorStorm's Revolutionary PowerStorm Forcible Door Entry Unit

Cordless Lithium Ion Power For Extreme Multi-Door Opening Capability!

"Fastest & Easiest Door Entry System on the Planet"

- ✓ Our commitment to innovative Cimatron technology and best in class engineering has allowed us to develop this very special DoorStorm Cordless Forcible Door Entry Unit.
- ✓ Custom Modified Makita-built cordless impact wrench with a 4-pole motor delivers 170 ft.lbs. (2040 in-lbs) of Max Torque in a compact size - Extreme power for easy forcible door entry.
- ✓ NO other unit in the world can match the power of this unique device.
- ✓ Extremely compact design at only 12" long, weighing only 18 lbs. for reduced single operator fatigue.
- ✓ Single operator use with no need for additional equipment (Halligan Bar, Door ram or lights)
- ✓ Built-in LED. Spotlight illuminates entry area - no need for extra tools/lights.
- ✓ Equipped with a phosphorescent bumper ring for quick location in dark spaces
- ✓ Ergonomic shape fits like a glove with even pressure and easy single lever trigger control.
- ✓ "Mag-Grip" tapered soft handle provides increased comfort during use.
- ✓ Our units are manufactured using the ultra high stress certified materials with the highest quality steel and a unique heat hardening process for maximum unbreakable strength and power.
- ✓ Our powerful 18V Lithium-Ion battery delivers 2,000 cycles with built-in shock absorbing features help protect the battery and sixteen firm-holding contact terminals deliver constant high power.
- ✓ The LXT Lithium-Ion battery and Rapid Optimum Charger produces 430% total lifetime work with 2.5x more cycles.
- ✓ The 30-Minute Rapid Optimum Charger with built-in fan to cool the battery producing more lifetime charges. This allows the PowerStorm unit the ability of opening a multitude of doors on a single charge.
- ✓ The charger earned the ENERGY STAR® label for meeting the strict energy-efficient guidelines set by the US Environmental Protection Agency (EPA) and US Department of Energy (DOE) - Caring for the environment is always a top priority.
- ✓ US patent design
- ✓ 3-year warranty on tool and 1-year warranty on battery and charger from Makita
- ✓ **What's in the PowerStorm Kit** DoorStorm's MAX / PowerStorm Unit with Halligan Pry Bar option with a Special custom modified Makita 18V LXT Lithium-Ion Cordless "PowerPak" Drive, two 18V LXT Lithium-Ion batteries, 30-Minute Rapid Optimum Charger, belt clip, comfort shoulder strap and tool bag.

### PowerStorm Features:

**POWER** - 170 ft.lbs. of Max. Torque from a Makita-built 4-pole motor - MAX power!

The LXT Li-Ion batteries charge in 30 minutes, runs longer and deliver 2.5X more cycles for even the most demanding forcible door entry needs. Power when you need it.

**COMFORT** - Only 18 lbs. with ergonomic grip with custom designed features throughout for maximum comfort and handling of unit.

**PERFORMANCE** - Open doors from the side - Extreme Safety means saving lives!

"Out Of The Line Of Attack"

**CONVENIENCE** - Built-in LED light with easy to find phosphorescent bumper ring.

Open doors in seconds - Unbelievable Speed Retract foot in seconds - No wait technology - Be ready for your next door in less than 2 seconds. Unbelievable! But a reality today!

**Free Spirit**  
Technology & Security Solutions

## DoorStorm Ultra and DoorStorm MAX! "World's Fastest, Lightest & Quietest Forcible Door Entry Device"

The DoorStorm units are manufactured completely in the USA in our own facilities and all components of DoorStorm Ultra and DoorStorm MAX are 100% precision hand-crafted.

Both units are mechanical, light-weight, hand-held (by a single operator) and capable of opening a multitude of variously constructed locked doors, including, but not limited to, hollow core doors, solid core doors, aluminum doors, steel doors, bolted doors, deadbolt locked doors and push bar steel doors. They deliver in excess of 13,000lbs of spreading force with minimum effort. In most cases, the door is still functional after forcible entry is achieved.

The DoorStorm units were developed to gain access to structures when normal means of access are locked, blocked or non-existent. They contain no hydraulics, pneumatics, oils, seals, priming fluids or hose lines. The units are operable in any orientation, including inverted, for generating substantial door opening excessive force - pull force, as well as enormous push force.

The units are engineered with heat-treated, aircraft quality, austenitic steels in order to preserve the products' long life and durability. The units' moving parts are coated with an advanced, specially designed, inert lubricant facilitating ease of operation.

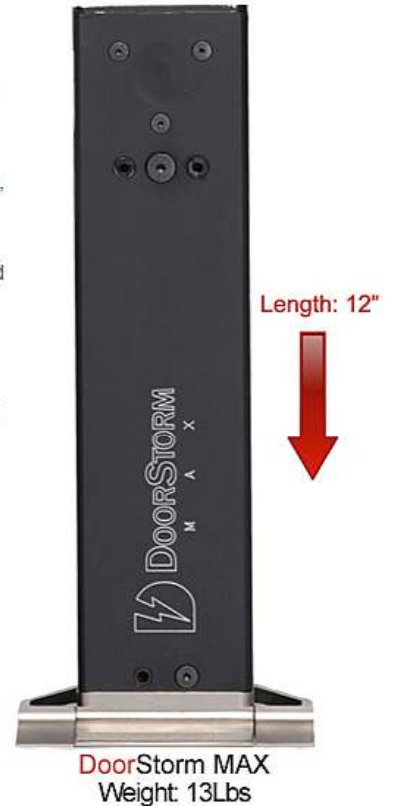

The units have great versatility and can be utilized in many areas. Both units can be used as a jacking or door-wedging device which prevents access to or exiting a room, and can be used by law enforcement agencies in hostage situations. Quiet entry when necessary for stealth operation.

DoorStorm units never need priming or monthly maintenance. Our systems have unlimited shelf life and are always ready for instant service when called upon - 24/7.

The units are designed to operate in the harshest, most extreme environments ranging from below zero degrees to 312 degrees Fahrenheit. Both units are water and rust resistant.

Cognizant of the environment, DoorStorm Enterprises builds its units environmentally friendly or "Green". The door entry process is designed to be totally inert - no oils or "O" ring blow-outs which can culminate in the spillage of toxic chemicals or fumes ceasing unit operation at critical times.

DoorStorm units feature a new Vanadium, high-stress steel expandable mechanical ratchet and cranking system which is unavailable in any other system and will increase torque as much as 17 times when extended.

### Features:

DoorStorm Ultra and DoorStorm MAX units provide major advantages over current, antiquated technologies.

Some of the benefits are as follows:

- ✓ 100% mechanical - no hydraulics (oil) or pneumatics (air) involved
- ✓ No hoses or seals - No priming or exercising!
- ✓ Unlimited shelf life - ready 24/7
- ✓ No maintenance - all mechanical parts / unlimited product life
- ✓ Lighter in weight than any other product in the market
- ✓ Smaller in size than any other available unit
- ✓ High impact resistance for harsh environments and industries - including Fire Departments, DEA, Military, Police, FBI, CIA, Federal Marshals & SWAT Teams
- ✓ Specialized, non-standard components that develop extremely high thrust and force with light operational functions
- ✓ Spreading force in excess of 13,000lbs - many times more force than required to open the most difficult doors
- ✓ Water and rust resistant
- ✓ Quiet entry when necessary - Stealth entry
