

## Sirennet Night Patrol LED Lightbar

The Sirennet Night Patrol LED Lightbar blends the functions of an intensely bright scene light and dual warning lights into a single unit. Dual-color CREE LEDs allow users to switch between a white scene light that fully extends across the housing face, and a warning light with split arrays of different colors. The 40 dual-color LEDs emit white and one alternate color: either amber, blue, red or white. The left and right sections function as warning lights. Heavy-duty black cast-aluminum housing with integrated passive heat sink improves LED performance. Comes complete with a 7-pattern flasher.

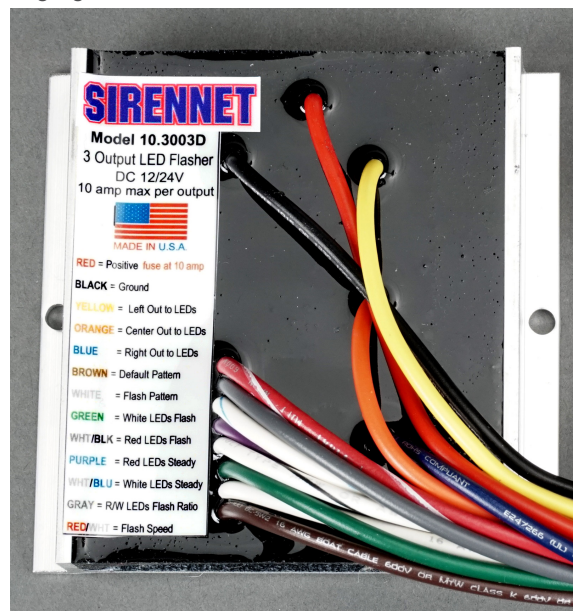

### FEATURES

- 40 Dual-color CREE LEDs allow users to switch between a white scene light, and warning light colors.
- The left and right sections function as Amber, Blue, or Red warning lights.
- The reflectors are Spots in the center and Floods on the ends.
- Clear lens cover protects LEDs.
- Weather and vibration resistant.
- Heavy-duty black cast-aluminum housings.
- Integrated heat sink improves LED performance.
- Mounting brackets allow vertical adjustment of light.
- Weather and vibration resistant.
- Long-lasting LEDs stay bright up to 30,000 hours.
- Comes complete with a 7-pattern flasher.
- Includes mounting hardware and 8 feet of 4 wire cable.

### SPECIFICATIONS

- Voltage: 12 - 24 VDC
- Amperage: 8 Amps Max
- Watts: 120 watts
- Lumens: 7200 Lumens
- Wiring: 8 feet of 4 wire cable.
- Temperature range: -80° F to 168° F
- Dimensions (w/o brackets): 3-1/2" H x 22" W x 3" D.
- Dimensions (w/ brackets): 4-1/2" H x 24-1/2" W x 3" D.
